

PRO STATEMENT
Osborn Elementary School District – Bond Election

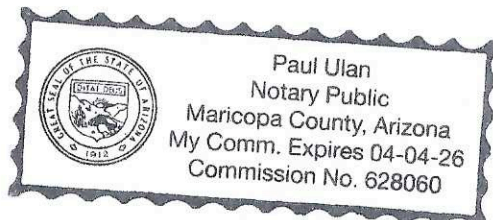

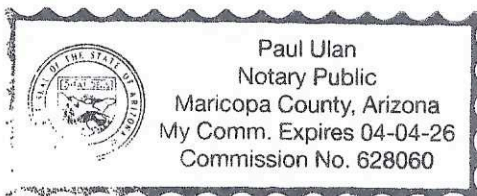

As a former state legislator and now your U.S. Congressman, I am committed to ensuring Arizona's children receive a quality education. I know firsthand how quality education can change a child's life — I was raised by a working-class single mom, and strong public schools made it possible for me to succeed. Here in Arizona and across the country, every child deserves that same opportunity to grow and thrive. Now, I am asking Arizona citizens to support their local school districts so every child has that same opportunity.

The Osborn Elementary School District provides its students with a first-class education, locally and nationally recognized. Now, the Osborn District needs your support in passing a bond election. The bond election will enable the district to maintain existing class sizes, continue essential student programs, and attract and retain quality teachers and staff — all of which benefit our kids, without increasing your property tax rate.

I would not be where I am today without quality public school education and the support of my community, and now I am asking for you to provide that same level of support for the children in the Osborn Elementary School District by voting YES for their bond election.

Congressman Ruben Gallego
