

Pro Statement

Osborn Elementary School District Bond and DAA Override

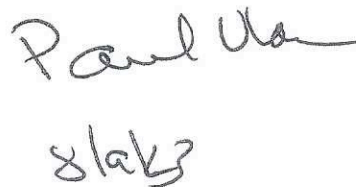

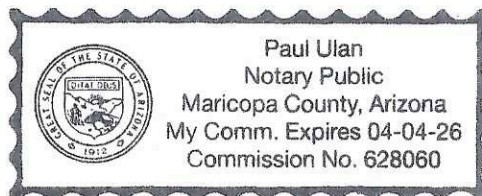

I have committed my career to improving my community – a gift from my parents that I continue to pass on to future generations. I know that a quality education opens doors to opportunities and empowers children to fulfill their potential and achieve their dreams. That is why I support renewing the Osborn's District Additional Assistance (DAA) Capital override and approving their bond request.

DAA funds are used to support curriculum materials and technology in the classroom. Bond funds will be used to increase student security and safety, renovate facilities, make improvements at each campus and purchase new buses. Both ballot measures are critical for the future of the district.

Education does not only happen in the classroom. The opportunities to teach our children occur throughout the day, and we should seize those precious occasions. Osborn is a community leader and strong community partner. They deserve our support. Please vote YES YES for the Osborn DAA and bond.
